

- PC01** Microscopic and molecular screening of myxosporeans in teleost fishes caught from Northeast Atlantic waters. *Graça Casal, Maria João Neves, Margarida Machado and Sónia Rocha*
- PC02** Exploring cannabinoids as a novel strategy against antimicrobial resistance: a systematic review. *Maria João Coelho, Márcia Carvalho, Inês Lopes Cardoso, Maria Conceição Manso and Cristina Pina*
- PC03** Antimicrobial photodynamic inactivation of *Pseudomonas aeruginosa* Biofilms: a synergistic approach with berberine, gentamicin, and colistin. *Ariana S.C. Gonçalves, Manuel Simões and Anabela Borges*
- PC04** Targeting quorum sensing: ferulic and sinapic acids compromise *Pseudomonas aeruginosa* biofilm architecture and virulence. *Miguel M. Leitão, Fernanda Borges, Manuel Simões, and Anabela Borges*
- PC05** Photodynamic inactivation of methicillin-resistant *Staphylococcus aureus* using harmine-antiseptic combinations. *Lília S. Teixeira, Sónia Fraga, Manuel Simões, and Anabela Borges*
- PC06** From In to Out: assessing antimicrobial-resistant *Escherichia coli* across treatment stages of wastewater. *Tiago Merêncio, Ofélia Godinho, Olga Lage and Sandra Quinteira*
- PC07** The potential of selected natural products as biofilm control agents and antibiotic resistance modifiers. *Francisca Massano, Mariana Sousa, Anabela Borges and Manuel Simões*
- PC08** Insect peptides as novel compounds against *Candida* spp. infections. *Catarina A. M Sousa, Francisco A. M. Silva and Célia Fortuna Rodrigues*
- PC09** Exploring antimicrobial resistance in autochthonous Portuguese hens: a study of *Escherichia coli* on eggshells. *Rita Jesus, Virgínia Ribeiro, Rui Dantas, Ana R. Freitas, Nuno V. Brito, Sandra Quinteira and Carla Miranda*
- PC10** Diagnostic pitfalls in *Staphylococcus* spp. surveillance: lessons from a multinational university student cohort. *Bárbara Pinheiro, Luís M. Gomes-Sampaio, Patrícia Pacheco, Carla Campos, Maria Pranto Braz, Cristina Coelho, Carla Miranda, Sandra Quinteira, Ana R. Freitas*
- PC11** Matrix metalloproteinases in focus: an exploratory epidemiological study in a northern Portuguese population. *Manon Foresti, Catarina Garcia, Maria Gonçalves, Marta Relvas and Alexandra Viana da Costa*
- PC12** A comparative analysis of the structural diversity of biosynthetic gene clusters in the phylum *Planctomycetota*. *Rita Calisto, Nicolai Kallscheuer and Olga Lage*
- PC13** Assessing awareness of human identification techniques among professionals and students at Fernando Pessoa University. *Maria Inês Guimarães, Hugo Ferraz, Beatriz Guedes, Beatriz Loibl, Vitor Pereira, Inês Castro, Pedro Soares Monteiro, Inês Lopes Cardoso, Francisco Taveira and Augusta Silveira*
- PC14** Knowledge, attitudes, and perceptions about child abuse among dental students. *Beatriz Guedes, Augusta Silveira, Beatriz Loibl, Isabel Abreu, Hugo Ferraz, Ana Sofia Pereira, Cristina Cardoso e Silva and Maria Inês Guimarães*
- PC15** The upcoming problematic of 3D-printed firearms: analysis of european news reports. *Maria Carrusca, Manuela Oliveira and Luís Marques Fernandes*
- PC16** Ozone: eliminating pathogens and safeguarding evidence in forensic sciences and other sectors. *Guilherme Gomes, Manuela Oliveira, Luís Marques Fernandes and Wilson Antunes⁷*
- PC17** Cyberattacks on critical infrastructures: the role of Forensic Sciences in prevention and investigation. *Miguel Morgado, Carla Malafaya, Manuela Oliveira, Luís Fernandes, Áurea Madureira-Carvalho and Rui Azevedo*
- PC18** Forensic Sciences and refugee children: identification and family reunification in humanitarian crisis scenarios. *Maria Morgado, Áurea Madureira-Carvalho, Manuela Oliveira and Luís Marques Fernandes*
- PC19** The power of DNA and fingerprint databases. *Manuela Oliveira, Sara Moreira, Ricardo Jorge Dinis-Oliveira, Pedro Correia, Maria Begoña Criado Alonso and Áurea Madureira-Carvalho*
- PC20** Under pressure leadership: ethical challenges and critical decisions in Forensic Science. *Gustavo Noël, Manuela Oliveira and Luís Marques Fernandes*
- PC21** Development of an assessment tool to identify the best practices and protocols for CBRN threats. *Diana Bravo-Leão and Luís Marques Fernandes*
- PC22** The role of Forensic Anthropology in identifying human commingled remains: a literature review. *Ivo Lacerda, Joaquim Rodrigues, Inês Moraes Caldas, Áurea Madureira-Carvalho and Manuela Oliveira*
- PC23** Forensic Anthropology: assessing reliability and sources of bias. *Joaquim Rodrigues, Ivo Lacerda, Inês Caldas, Áurea Madureira-Carvalho and Manuela Oliveira*
- PC24** Decomposition of intestine: contribution of *Escherichia coli* in cadaveric phenomena. *Maria Silva Azevedo and Célia Fortuna Rodrigues*
- PC25** Bacterial load and dynamics: exploring their potential as biomarkers for postmortem interval estimation. *Maria J. Teixeira, Daniel J. Barbosa, Ricardo Jorge Dinis-Oliveira and Ana R. Freitas*
- PC26** Exploring the potential of dichloroacetate in targeting oral cancer metabolism. *João Teixeira, Andrea Cunha and Patrícia M. A. Silva*
- PC27** The oral health implications of changes in the diabetic oral microbiome. *Jessica Gonzva, Beatriz Loibl, Maria Inês Guimarães, Beatriz Lopes, Hugo Ferraz, Augusta Silveira and Ricardo Magalhães*
- PC28** Isoquinolinequinone N-oxides as potent antitumor compounds against pancreatic cancer cell lines: preliminary results. *Rúben Rodrigues, Ryan D. Kruschel, Florence O. McCarthy, M. Helena Vasconcelos and Cristina P. R. Xavier*
- PC29** Patient-reported outcomes in oral oncology: new approaches, contemporary visions. *Inês Castro, Maria Inês Guimarães, Sandra Gavinha, Pedro Lopes Ferreira, Isabel Silva, Nuno Ribeiro, Teresa Sequeira and Augusta Silveira*
- PC30** Ivermectin decreases the expression of ALDH1 in ovarian cancer cell lines in combination with chemotherapy. *Cláudia Santos, Érica Oliveira, Sofia Ally, Mariana Nunes, Albina Resende and Sara Ricardo*
- PC31** Lymphocyte population characterization in ovarian cancer microenvironment. *Ana Rita Nunes, Tomás Rodrigues, Fernanda Garcez, Sara Ricardo, Albina Dolores Resende and Carla Batista-Pinto*
- PC32** Gadoteric acid and gadolinium exposure – what is the impact on kidney gene expression? *Susana Coimbra, Susana Rocha, Sofia D. Viana, Rute Rebelo, Maria João Valente, Cristina Catarino, Luís Belo, Elsa Bronze-da-Rocha, Flávio Reis and Alice Santos-Silva*
- PC33** Inflammatory and senescence-related effects of polyethylene microspheres on dermal cells. *Carolina Morgado, Ana Silva, Maria Teresa Cruz, Cláudia F. Pereira and Rosa Resende*
- PC34** Beer enriched with “Lapins” cherry extracts: antioxidant activity and liver toxicity. *Diana Santos, Maria João Pereira, Ana Isabel Oliveira and Cláudia Pinho*
- PC35** Immune microenvironment of the omentum in appendicitis: a phenotypic perspective in cell populations. *Sara Marques, Márcio Gaspar, Fernanda Garcez, Carla Batista-Pinto, Sara Ricardo and Albina Dolores Resende*
- PC36** Potential skin benefits of incorporating *Prunus avium* Lapins extracts into a commercially available Portuguese India Pale Ale craft beer. *Maria João Pereira, Diana Santos, Cláudia Pinho and Ana Isabel Oliveira*
- PC37** Gamification in e-Health: strategies for oral health. *Inês Castro, Maria Inês Guimarães, Sandra Gavinha, Pedro Lopes Ferreira, Isabel Silva, Nuno Ribeiro, Cristina Cardoso Silva and Augusta Silveira*

- PC38** Analysis of multiple pesticide and endocrine disruptor residues in drinking water using SPE and GC-MS/MS. *Diana Fernandes, Ana Gorito, Ana Rita Ribeiro and Cláudia Ribeiro*
- PC39** Enantioselective liquid chromatography method for the simultaneous determination of chiral and achiral fungicides in aqueous matrices. *Beatriz Suordestem, Joaquín Marrero, Ana Gorito, Cláudia Ribeiro and Ana Rita L. Ribeiro*
- PC40** Monitoring azole antifungals in water: a step toward environmental and human health protection. *Marta O. Barbosa, Luís D. Madeira, Ana R. L. Ribeiro and Adrián M. T. Silva*
- PC41** Fluoroquinolones: a preliminary study on optimized extraction and chromatographic methods. *Ana Rita Carvalho, Renata Vidal, Virgínia M. F. Gonçalves, Alexandra S. Maia, Ana Rita L. Ribeiro and Cláudia Ribeiro*
- PC42** Analytical techniques for microplastics analyses. *Magdalena Podbielska, Ewa Szyrka and Wojciech Strojny*
- PC43** Microplastics in rice: an invisible threat. *Iva Ferreira-Marques, Sara A. M. Silva and Joana C. Prata*
- PC44** Optimization and validation of an HPLC-DAD method for the identification of 14 cannabinoids: application in Cannabis sativa L extracts. *Ana F. Morais, Robin Fertig, Ricardo Jorge Dinis-Oliveira and Carlos J. A. Ribeiro*
- PC45** Analysis of terpenes in cannabis by GC-MS: method development and its application to Cannabis sativa L extracts. *Albertina M. Capita, Ana F. Morais, Ricardo Jorge Dinis-Oliveira, Carlos J. A. Ribeiro and Eduarda M. P. Silva*
- PC46** Enantiomeric profiling of ketamine in street samples for recreational use. *Inês Varela, Nuno Milhazes, Daniel Martins, Virgínia Gonçalves, Maria Elizabeth Tiritan and Cláudia Ribeiro*
- PC47** GC-MS-Based Study of 14 Cannabinoids Separation in Cannabis sativa L. Extracts using a Derivatization Approach. *Bruna A. S. Nunes, Albertina M. Capita, Ana F. Morais, Ricardo J. Dinis-Oliveira, Carlos J. A. Ribeiro and Eduarda M. P. Silva*
- PC48** Enantioseparation of 3-chloromethcathinone by liquid chromatography at the milligram scale. *Ivan Langa, Cláudia Ribeiro, Virgínia Gonçalves, Diana Dias-da-Silva, Sara Cravo and Maria Tiritan*
- PC49** Cebiranopadol, a first-in-class investigational opioid: Insights from preliminary cytotoxicity assays. *Margarida Almeida, Beatriz Diogo, Joana Rocha, Ricardo Jorge Dinis-Oliveira, Andrea Cunha, Juliana Faria and Joana Barbosa*
- PC50** Dual-action breakthrough: Fiscalin derivatives targeting amyloid burden and acetylcholinesterase for Alzheimer's therapy. *Inês Costa, Daniel José Barbosa, Maria Emilia Sousa and Renata Silva*
- PC51** Efficacy and safety of semaglutide for obesity: A systematic review of phase 3 clinical trials. *Rui Salvador, Carla Guimarães Moutinho, Carla Sousa, Ana Ferreira Vinha, Márcia Carvalho and Carla Matos*
- PC52** Antibiotic prescription in dentistry: Systematic and critical evaluation. *Sabien van Straaten, Hugo Ferraz, Maria Inês Guimarães, Beatriz Loibl, Beatriz Guedes, Inês Castro, Pedro Soares Monteiro, Inês Lopes Cardoso, Augusta Silveira and Ricardo Magalhães*
- PC53** Cannabis-based therapies in chronic pain management: A systematic review of clinical trials. *Carla Matos, Ana Teresa Pereira, Maria João Dias, Rui Salvador, Carla Sousa, Ana Ferreira Vinha, Márcia Carvalho and Carla Guimarães Moutinho*
- PC54** Cytotoxic effects of cannabidiol on human metastatic melanoma cells: a potential therapeutic strategy? *Maria Moreira, Natanael Videira, Verónica Rocha, José Catita², Sérgio Barreira, Ana Margarida Araújo and Márcia Carvalho*
- PC55** Hidden dangers of synthetic cathinones: unveiling the role of oxidative stress in the cardiotoxicity of methylone and 3,4-DMMC. *Verónica Rocha, Maria Moreira, Ana Margarida Araújo and Márcia Carvalho*
- PC56** Chalcone Derivatives with Potential Antimitotic Activity. *Patrícia M. A. Silva, Eduarda Alves, Lara Cruz, Rita Santos, Daniela Pereira, Henrique Assunção, Honorina Cidade and Hassan Bousbaa*
- PC57** Assessment of the Antitumor Potential of Flavonoid-Amino Acid Conjugates. *Flávia Barbosa, Andrea Cunha, Cláudia Pinto, Hassan Bousbaa, Honorina Cidade, Patrícia M. A. Silva, Maria Elizabeth Tiritan and Odília Queirós*
- PC58** Novel Edaravone Derivatives as Neuroprotective Agents for the Treatment of ALS. *Sandra Barreiro, Fernando Cagide, Fernanda Borges, Fernando Remião and Renata Silva*
- PC59** Dietary habits and health conditions associated with microplastics in human feces. *Sara A.M. Silva, Tony R. Walker and Joana C. Prata*
- PC60** Heavy Metal Profiles in Teas and Herbal Infusions: A Cross-Country Analysis. *Ana Sousa, Rui Azevedo, Agathe Richardeau, Agostinho Almeida, Cristina Couto, Cláudia Ribeiro, Virgínia Gonçalves, Ana Rita Ribeiro, Inês Pádua and Sandra Leal*
- PC61** Exploring the Microbiota of Eucalyptus globulus Leaves: Identification of Potential Beneficial Microorganisms. *Telma Nunes, Olga Lage, Ana Quintela and Paula Melo*
- PC62** The selective bioherbicide action of a microalgae isolated from a Portuguese soil. *Telma Nunes and Paula Melo*
- PC63** Unfit for Consumption: Microbiological Risks of Natural Water Sources in Rural Areas. *Inês Rodrigues, Ofélia Godinho, Olga Lage and Sandra Quinteira*
- PC64** Evaluating Mediterranean Diet Adherence, Physical Activity and Weight Perception in Portuguese Adolescents. *Maria Teresa Moreira, Beatriz Loibl, Augusta Silveira, Beatriz Lopes, Hugo Ferraz, Maria Inês Guimarães, Sandra Rodrigues and Andreia Lima*
- PC65** Effectiveness of MetWLP, a Tailored Metabolic Weight Loss Program in Overweight and Obese Women: A 6-Month Study. *Rui Linhares, Francisco Pinho and Marisa Machado*
- PC66** Ecotoxicity effects of 3-chloromethcathinone (3-CMC) on the swimming behaviour of Daphnia magna: Preliminary data. *João António, Ivan Langa, Ana Carvalh, Renata Vidal, Maria Tiritan and Cláudia Ribeiro*
- PC67** Self-reported prevalence of diseases commonly linked to poor environmental sanitation and water-borne diseases among residents of Anil, Rio de Janeiro - Cross-sectional study. *Maria Manso, Rosemerie Barros and Alfredo Akira Ohnuma Jr.*
- PC68** Effects in apoptosis and neurotransmitters after exposure to 3-chloromethcathinone during embryonic development of zebrafish: preliminary results. *Ondina Ribeiro, Luís Félix, Cláudia Ribeiro and João Soares Carrola*
- PC69** Preliminary data on the ecotoxicity effects of the novel synthetic cathinone 3,4-methylenedioxypyrovalerone (MDPV) on Danio rerio during early developmental stages. *Ariana Pérez-Pereira, Ondina Ribeiro, Luís Félix, Maria Tiritan, Cláudia Ribeiro and João Carrola*
- PC70** Environmental exposure to metal(loid)s: An emerging risk factor for osteoporosis in postmenopausal women? *Carlos Kunioka, Vanessa Souza, Bruno Rocha, Fernando Júnior, Luís Belo, Maria Manso and Márcia Carvalho*
- PC71** Exploring the toxicity effects of 3-chloromethcathinone (3-CMC) on the morphophysiological parameters of Daphnia magna. *João António, Ivan Langa, Ana Carvalh, Renata Vidal, Maria Tiritan and Cláudia Ribeiro*
- PC72** From pollutant to product: the bioactive potential of fungal biomass obtained through bioremediation processes. *Ana Sousa, Virgínia Gonçalves, João Costa and José Andrade*
- PC73** Evaluation of P-glycoprotein activity mediated by fiscalin derivatives at the rat intestinal barrier. *Beatriz Moreira, Pedro Sousa, Nuno Silva, Nuno Milhazes, Renata Silva, Fernando Remião, Maria Emilia Sousa and Carolina Rocha-Pereira*
